

## Made in Baden-Württemberg

Our precision mixers are the result of our total commitment to quality, innovative technology, years of experience and consistent further development of tried and tested systems.

# MVA DL 1500 mixers

## Atex certified with stand and collecting tank

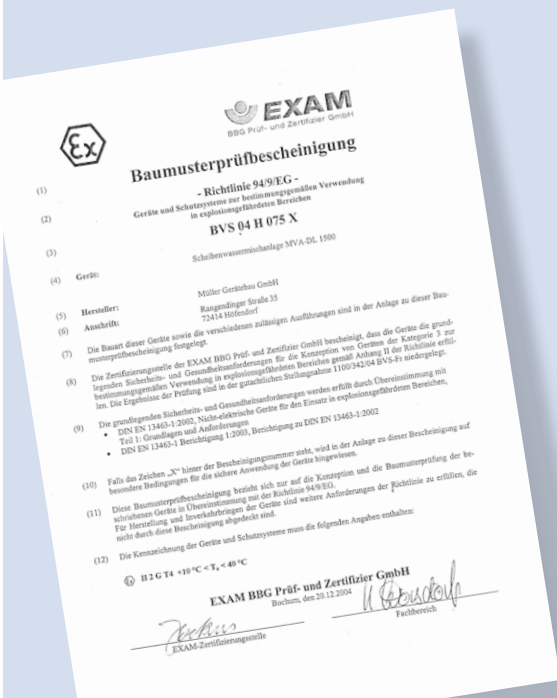

Our MVA DL 1500 air operated mixers are type tested and approved.

As an operating medium, compressed air is a highly reliable source of energy that is used to an increasing extent.

Emulsion mixers and systems

The illustrated drum is not included.

## MVA DL 1500 mixers

Atex certified with wall bracket

### Design features:

These mixers are suitable for direct connection to drinking water pipes according to DIN EN 1717. The backflow preventer type AA is suitable for the fluid categories 2, 3, 4, 5. The specified backflow preventer is included in the scope of supply and complies with the requirements of the Water Resources Law. The system is a single unit consisting of a TÜV approved collecting tank with stand and stainless steel pressureless preliminary water tank.

### Capacity:

**MVA DL 1500:** 1500 l/h, water pipe G 1/2"

### Mixing media:

Water, KSS emulsion, Glysantin, alcohol-based screenwash

### Mixing range:

The mixing range is continuously variable.

The system is also available in a shorter version with wall bracket for tank container operation.
